ART UNIT PAPER NUMBER

1763

SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	01/08/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

10/615,381

Applicant(s)

NISHIUCHI ET AL.

Examiner

Richard Bueker

Art Unit

1763

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 October 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 14, 15 and 21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 14, 15 and 21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1763

In claim 21, line 12, the spelling of "substantially" should be changed to correct a typographical error.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14, 15 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tochishita I (6,280,792) or Tochishita II (EP 992605), either taken in view of Satoh (JP 60-92466).

Tochishita I (see Fig. 8) and Tochishita II (see Fig. 8) each discloses a surface treating apparatus comprising a treating chamber connected to an evacuating system, wherein a heater for melting and evaporating a wire is disposed in the treating chamber. The wire can be aluminum wire (col. 4, lines 61-65). A rotatable cage shaped work retaining member is disposed in the treating chamber. A supply of the wire, wound around a feed reel, is included in the apparatus, and the feed reel is mounted so as to rotate about a substantially vertical rotational axis. As shown in Fig. 8 of Tochishita I and II, a thermal resistant protective tube 47 is disposed between the feed reel and the heater for melting and evaporating. The feed path of the wire includes a horizontally disposed lower portion, a vertically disposed intermediate portion, and a horizontally disposed upper portion as claimed in claim 21. Tochishita I and Tochishita II do not discuss the gas content of their wire. Satoh (see the English translation) teaches that an aluminum wire that is conventionally used as a source material for vacuum

Art Unit: 1763

evaporation coating typically or inherently contains hydrogen. Satoh teaches that it is desirable to reduce the amount of hydrogen in the aluminum wire prior to the vapor deposition process, because this will improve the quality of the deposited aluminum coating. It is noted also, however, that Satoh also makes clear that an aluminum coating can successfully be deposited by using an aluminum wire of unreduced hydrogen content, although the resultant coating is of lesser quality. It would have been obvious to use the type of hydrogen containing aluminum wire described by Satoh as the aluminum wire in the Tochishita I or Tochishita II apparatus, with either a reduced hydrogen content as preferred by Satoh, or with an unreduced hydrogen content as not preferred by Satoh, because Satoh makes clear that it was known in the prior art that an aluminum coating could successfully be deposited on a work-piece by using an aluminum wire that contains hydrogen. Regarding the use of a non-preferred embodiment, see *In re Boe*, 148 USPQ 507.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

The English language documents filed by applicants on October 24, 2006 were not filed together with a statement that the translation of the certified copy is accurate as required by 37 CFR 1.55.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1763

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Bueker whose telephone number is (571) 272-1431. The examiner can normally be reached on 9 AM - 5:30 PM, Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Parviz Hassanzadeh can be reached on (571) 272-1435. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
